SUBJECT: Notice – Extension of Water Shortage Order No. SWF 07-02
: (Drought Impacts Still Being Experienced)

Dear Water Use Permit Holder:

The Southwest Florida Water Management District (District) regularly monitors rainfall patterns, river flows, groundwater levels and other drought indicators in accordance with its Water Shortage Plan (Chapter 40D-21, Florida Administrative Code). Many of these drought indicators remain abnormally low despite the arrival of the summer rainy season.

Taking into consideration current conditions and other information received at its June 24, 2008 meeting, the District's Governing Board has extended Water Shortage Order No. SWF 07-02 through September 30, 2008. This means that the effects on your permit, including the Order's once-per-week lawn watering schedule and other restrictions, will remain. Regular lawn watering often is not needed during the rainy season, so it is important to make good irrigation decisions even when it is "your" day. For more details about the current restrictions and Florida-friendly yards, please visit the District's website (www.WaterMatters.org).

Local lawn watering ordinances which are at least as stringent as the District's regional restrictions will continue to be recognized. The District also will continue to monitor its drought indicators so that its restrictions can be removed when conditions warrant that action. If you have any questions about how the current restrictions continue temporarily to affect your permit, please contact your local permitting office (see phone numbers above) or call 1-800-848-0499 or 1-800-423-1476, extension 4498, during normal business hours.

Sincerely,

David L. Moore, P.G.
