City of Dunnellon Press Release

FOR IMMEDIATE RELEASE:

March 9, 2018

Media Contact:

Dawn M. Bowne, City Administrator

The Marion County Fire Department under the supervision of the City utility department will conduct mandatory fire hydrant testing all day throughout the City, beginning Tuesday March 13 through Thursday March 15 and continuing Tuesday March 20 through Thursday March 22. Because of the high intensity of hydrant flushing required this particular year, which ensures an excellent ISO rating that has a direct effect on property insurance ratings, you may experience temporary water pressure reduction or water quality issues during these tests. The schedule was developed to minimize impact to our customers. However, if you experience any water discoloration, which is normal, please let your water run until it is clear. If you have any questions or concerns, please contact our Utility Department at 352-465-8590. Thank you for your patience through this necessary process.
