

# An Open House Invitation

Springs protection is consistent with Marion County's long-standing springs water quality protection initiatives. The Florida Springs and Aquifer Protection Act passed by the 2016 State Legislature requires the development of a plan for addressing the impact of septic tanks on our springs. Marion County is hosting a series of informational open houses specifically focused on addressing the impact of septic systems on the spring systems in our county.

## Join Us for One of the Socially Distanced Open Houses to Learn About:

- What is happening at the state level related to water quality issues.
- The environmental concerns associated with Silver and Rainbow Springs.
- The state requirements associated nutrient loads coming from septic tanks in the Silver and Rainbow Springs Springsheds.
- The county's proposed options for addressing state septic system requirements in the county.

State requirements associated with septic tanks must be addressed, but how we address these requirements should fit our county and community culture. We need your input!

**Marion Oaks Community Center**  
294 Marion Oaks Ln  
Ocala, FL 34473  
6:00 - 8:00 pm
